Sustained lift

Washable 40°

Ergonomic

Removable

Breathable

Hypoallergenic

AURORA

Active is the new frontier of rest.

A mattress that contains carbon in both the structure and the textile parts, and that uses Bioceramics, in its Memory, to offer all the benefits of Fir. Bio Crystal is a top quality Memory to which sixteen minerals are added, plus gold and silver.

These minerals produce frequencies (Fir) that improve blood circulation, recovery and offer many benefits to the psyche.

In fact, Bioceramics stimulates the release of melatonin, facilitating sleep, and has an analgesic action.

Furthermore, the Active mattress has a zero gravity structure, therefore eliminating pressure points on the joints, ensuring correct posture throughout the rest.

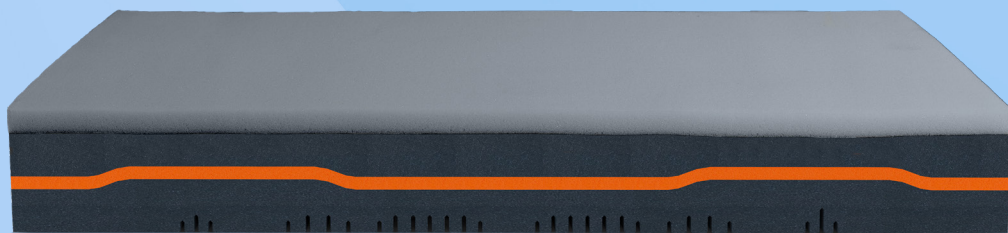

MATERIALS:

The Active mattress cover is made of Graphene. The carbon contained in the fabric offers a shielding action, protecting the body from electromagnetic radiation produced by household appliances that are increasingly present in homes.

TECHNOLOGY:

- 5 cm Memory Bio Crystal
- 15 cm X-Carbon
- 2 cm Ecocell
- 15 cm X-Carbon
