Removable

Breathable

Hypoallergenic

AURORA

The Relax mattress is a product with exceptional resilience, having an inimitable elastic response. Equipped with Flip technology, it can therefore be turned upside down, as well as rotated, it has two sides of use in the technological PurO material, a product with a yield similar to latex, but with significantly superior breathability.

These characteristics are then reinforced by its high density central layer, which guarantees its durability over time as well as a high degree of support.

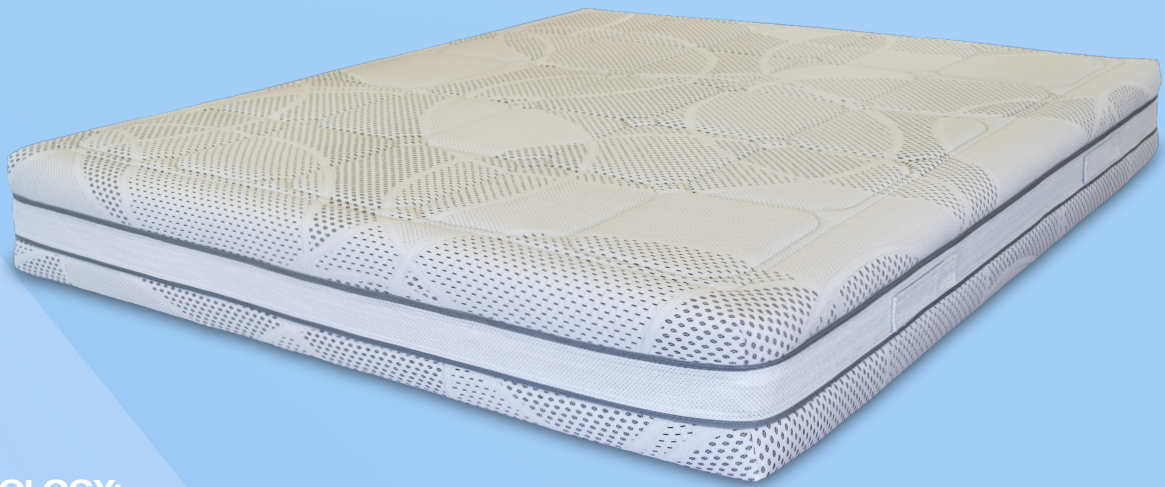

The support surfaces are worked with differentiated load bearing capacity, to offer greater acceptance on the shoulder area.

The possibility of turning the mattress upside down is ideal when there is a large difference in weight between users, in fact balancing the wear on four possible sides of use.

MATERIALS:

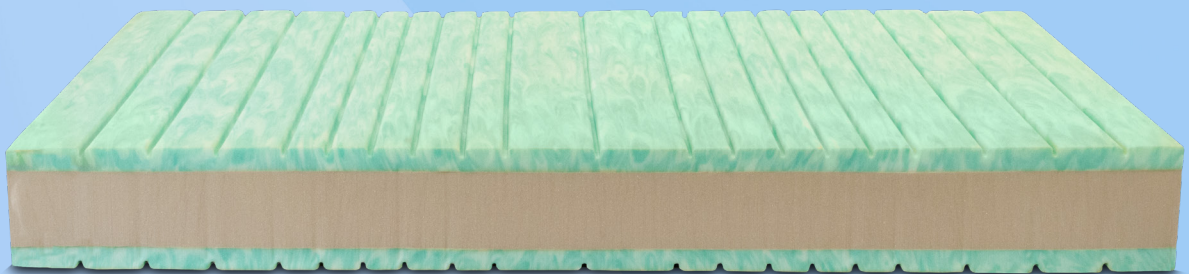

The Relax mattress cover is made of Silver Safe fabric in silver fiber.

The precious metal offers an antibacterial action, increasing the hygiene of the sleeping surface, making it ideal for people who suffer from allergies or who are looking for a sleeping surface that is always clean.

TECHNOLOGY:

- 5 cm PurO TS
- 10 cm Acquafoam HD
- 5 cm Puro TS
